EDUCATION:

Bachelor (Honors) in Computer Science

October 2023 - October 2027

GC University, Lahore.

Subjects: Probability And Statistics, Software Engineering, Programming Fundamentals, Object-Oriented Programming, Data Structures and Algorithm (DSA), Database Systems, Artificial Intelligence, Machine Learning, Theory of Automata.

Certificate in IT : Web-development

March 2025 – June 2025

Institute: Corvit Networks .(Pvt) Ltd , 77 G, Gulberg 3 Lahore

Subjects: Frontend Technologies, HTML5, CSS3, Bootstrap, JavaScript (JS), React, Angular, Object-Oriented Programming, Backend Technologies, NodeJS, MongoDB, SQL, Express.

Intermediate In Engineering (FSc Pre-Eng)

August 2021 - July 2023

Punjab College of Sciences Campus 8, Lahore.

Grade: A+

PROJECTS:

- **GUI based Bachelor's Admission System:**

I made this project using Object Oriented programming concepts of Encapsulation, Abstraction, Inheritance and Polymorphism. The project includes the whole admission system process (e.g Form filling, Merit Calculation and Generating Merit lists).

- **Book Store Management System:**

I designed and developed a Book Center database management system using MySQL. The system managed book inventory, customer records, sales, and billing operations. It included designing normalized tables, establishing relationships for efficient data handling. The project focused on ensuring data integrity, query optimization, and scalable database design.

- **Real-Estate Website Project:**

I build the Real-Estate Website using the MERN Stack Technologies of MongoDB, Express, React and NodeJS. The website allows users to search and filter property listings easily. It provides features like property posting for sellers, detailed property pages with images and descriptions, user authentication (login/register), and contact options for potential buyers. On backend, Node.js and Express.js handle the server-side

logic and API integration, while MongoDB is used for storing property details, user accounts, and related data. The frontend is built with React.js, providing a responsive and interactive UI with smooth navigation.

EXPERIENCE:

- **Full Stack Developer | Devanum** **August 2025 - February 2026**
 - Developed web applications in production using MongoDB, Express.js, React.js, and Node.js. Designed and built RESTful APIs with the MVC pattern.
 - Created responsive interfaces using React.js hooks and a component-based approach. Enabled JWT authentication and RBAC features.
 - Tasks included designing schemas for MongoDB, making API calls, performing CRUD operations, and implementing middleware in a setting that involved Git and Agile practices.

INTERPERSONAL SKILLS:

- Programming Languages: C++, Python
- Efficient Problem Solving skills.
- MS Office (Word, PowerPoint, Excel)
- Ability to accept responsibility and make them more reliable for other to accept.
- Able to manage organizational resources effectively and achieve the targets in time.
- Solution oriented attitude towards people and their problems.
- Highly motivated, devoted and committed to professional standards.

LANGUAGES:

- English
- Urdu
